Allowable Subject Matter

Claim 1-3, 5, 7, 9, 11-19 and 21-33 allowed.

Examiner Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ernest D. Buff on 8/25/2010 and 8/27/2010.

The application has been amended as follows:

- Claim 20 has been cancelled.
- Claims 1, 29, 32, 32 and 33 are amended as follows:
 - **Add** the limitation of cancelled claim 20 in the last line of each claim:
"wherein the resinous binder further comprises a cross-linker in an amount ranging up to about 10 weight percent".
- Claim 30 is amended as follows:
 - **Delete** on line 14 "of which is in the range of about 8 to 17 micron" and
Add "of about 11 +/- 1.5 micron"

Art Unit: 1782

- **Add** on line 19 of the claim the limitation "and said mat has a permeability of at least about 300 cfm/ft² measured in accordance with ASTM Standard D737 at a differential pressure of 0.5 inches of water."
- **Add** on the last line of the claim: "wherein the resinous binder further comprises a cross-linker in an amount ranging up to about 10 weight percent".
- Claim 31 is amended as follows:
 - **Add** "A fibrous mat" at the beginning of line 1.
 - **Delete** "a" on line 1 and **replace** with "the" so that the claim reads
"A fibrous mat for use as a face for a gypsum board, the fibrous mat comprising"

Reasons for Allowance

The following is a statement of reasons for the indication of allowable subject matter: The current rejections rely on Gill for teaching that it would have been obvious to optimize the blend of the claimed fiber sizes to achieve the desired porosity. However Gill teaches a low permeability mat and Applicant amended the independent claims to recite a permeability of 300 CFM/FT². Gill teaches away from the fibrous mat with high permeability. In addition, Gill does not teach a binder with a cross-linking agent.

Based on the prior art of record, it would not have been obvious nor predictable to one of ordinary skill in the art to combine the claimed amount of crosslinking agent in

Art Unit: 1782

combination with optimizing the claimed composition of fiber sizes having an average fiber diameter of 11 +/- 1.5 micron and 1-30% of an average fiber diameter of less than about 5.5 micron in order to achieve the higher permeability mat.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JENNIFER STEELE whose telephone number is (571)272-7115. The examiner can normally be reached on Office Hours Mon-Fri 8AM-5PM.
